

VINOD PYARELAL YADAV

Engineering Manager | Mobile & Enterprise Architecture | Scalable Systems

yadav.vinod579@gmail.com | +91-9916774150 | Bengaluru, Karnataka | linkedin.com/in/vinod-pyarelal-yadav-46ba1943

PROFESSIONAL SUMMARY

Results-driven Engineering Manager with 14+ years of experience leading cross-functional teams of 20–50 engineers to deliver enterprise-grade mobile, IoT, AI-powered, and web platforms at scale. Proven track record of improving system performance by 30%+, shipping solutions supporting 30K+ users and devices, and reducing time-to-market through CI/CD automation. Deep expertise in Android/iOS, MDM/EMM, AI-agent-driven platforms, system architecture, and Agile delivery across Retail, Transit, Healthcare, Agri-Tech, and Enterprise Mobility verticals. Adept at hiring, mentoring, setting OKRs, managing stakeholder relationships, budget ownership, and aligning engineering roadmaps with business strategy.

KEY IMPACT HIGHLIGHTS

- Team Scale: Led cross-functional teams of 20–50 engineers across 5+ concurrent enterprise programs
- Performance: Improved system performance by 30%+ across Android, iOS, and web platforms
- User Scale: Delivered production-grade solutions serving 30K+ users/devices globally
- Architecture: Architected scalable MDM, IoT, AI-agent, transit payment, and retail mobility platforms from 0 to production

PROFESSIONAL EXPERIENCE

Accenture | Custom Software Engineering Manager

Bengaluru • Jun 2024 – Present

- Spearheaded end-to-end delivery of 3 enterprise mobility programs simultaneously, managing a team of 35+ engineers across Android, iOS, and web stacks, achieving 100% on-time milestone delivery.
- Managed engineering budget and resource allocation for a 35-engineer org, overseeing headcount planning, vendor costs, and tooling investments — optimizing team structure to reduce operational costs by 15%.
- Designed and deployed MDM/EMM solutions for provisioning and managing 10,000+ enterprise devices, reducing device onboarding time by 40% through automation.
- Built Automated Transit Payment Systems (ATPS) integrating NFC, embedded POS, and smart card workflows, processing 1M+ contactless transactions with 99.9% uptime.
- Established CI/CD pipelines using Jenkins, Git, and DevOps tooling, reducing release cycle time from 3 weeks to 5 days and cutting production defects by 35%.
- Delivered GroceryTech mobile solutions with Bluetooth proximity, real-time location tracking, and barcode scanning, improving warehouse operational efficiency by 25%.
- Led the Darwin Portal program for client Syngenta, architecting a React Native for Web application with an AI assistant powered by an orchestrator-core architecture, integrating CopilotKit, AG-UI, and A2-UI frameworks together with Claude AI agents to drive end-to-end implementation.
- Engineered Darwin Portal backend services using Claude-Agent for web APIs and Python on Databricks, applying data analysis and model training to power crop-yield prediction for harvest planning, crop stabilization trend forecasting, and seed-loss risk prediction.
- Defined quarterly OKRs for the engineering team, conducted bi-weekly performance reviews, and drove hiring of 8 senior engineers, reducing team attrition by 20%.
- Managed stakeholder communications across client leadership, product, and operations teams, ensuring roadmap alignment and proactive risk mitigation.

HTC Global Services | Senior Consultant – Lead

Bengaluru • Oct 2016 – May 2024

- Led Agile delivery for 8+ enterprise Android/iOS products over 7+ years, managing sprints, code reviews, and release planning for teams of 15–25 engineers.
- Oversaw budget planning and cost management for engineering operations, handling resource allocation across multiple concurrent client engagements and optimizing headcount utilization.
- Delivered Jenkins-based CI/CD infrastructure supporting 30K+ user deployments, reducing build failures by 45% and improving release stability significantly.

- Architected real-time last-mile delivery tracking platform for Meijer (GroceryTech), leading a 10-member team and delivering 3 major releases on schedule.
- Drove R&D initiatives and algorithm design for IoT and sensor-driven mobile applications, improving operational efficiency by 20% for field teams.
- Mentored 10+ junior and mid-level engineers, establishing coding standards, PR review processes, and technical documentation practices that reduced bug escape rate by 30%.
- Collaborated with cross-functional stakeholders — product, QA, DevOps, and clients — to define roadmaps, milestones, and delivery SLAs.

Clean Bill of Health | Android Developer

Bengaluru • Nov 2015 – Sep 2016

- Owned end-to-end engineering delivery for a healthcare IoT Android app, integrating Wi-Fi modules and smart indicators for medicine reminders serving 5,000+ users.
- Provided architectural leadership by evaluating 3rd-party SDKs, driving optimized, secure designs through R&D and delivering cloud-integrated mobile solutions.
- Ensured high-quality releases through automated testing, issue resolution, and adherence to HIPAA-aligned engineering standards.

3Cent Consultancy (Infosys) | Senior Software Engineer

Bengaluru • May 2015 – Oct 2015

- Delivered end-to-end web solutions using Node.js, React, and MySQL — from mockup to production — within tight 3-month delivery windows.
- Improved release quality through proactive debugging and performance optimization, reducing critical production issues by 25%.

Xoriant Solutions Pvt. Ltd | Senior Software Engineer

Mumbai • Mar 2014 – Apr 2015

- Built and maintained scalable, data-driven web applications using Node.js, PHP, and MySQL serving enterprise clients.
- Improved application stability through systematic code fixes, enhancements, and controlled release processes, achieving 99%+ uptime.

IT Gurus Software | Software Engineer

Mumbai • Oct 2012 – Feb 2014

- Developed innovative Android applications with NLP capabilities, integrating 3rd-party SDKs and improving user engagement metrics by 30%.

Yesha IT Solutions Pvt. Ltd | Software Engineer

Mumbai • Apr 2012 – Sep 2012

- Delivered a customer-focused order processing mobile solution with SQLite offline database, optimized algorithms, and reliable data integrity.

Hurix Systems Pvt. Ltd | Integration Developer

Mumbai • Aug 2011 – Mar 2012

- Delivered engaging UI solutions with seamless media integrations and improved platform performance through benchmarking and secure API integrations.

KEY PROJECTS

Darwin Portal – Syngenta (Agri-Tech AI Platform)

Architected an AI-powered agricultural intelligence portal using React Native for Web, CopilotKit, AG-UI, and A2-UI frameworks, with an AI assistant built on an orchestrator-core architecture and Claude AI agents driving implementation. Built backend web APIs with Claude-Agent and Python/Databricks pipelines, applying data analysis and model training for crop-yield prediction to support harvest planning, crop stabilization trend forecasting, and seed-loss risk prediction.

PRESTO – Transit Payment System (Canada)

Architected and delivered a secure transit payment platform integrating NFC, FarePay smart cards, embedded POS, and backend systems. Managed MDM/EMM for large-scale device deployment across the transit network; achieved 99.9% uptime and regulatory compliance.

VusionGroup – Retail IoT & ESL Solutions

Delivered GroceryTech mobile apps with real-time Bluetooth proximity tracking, camera scanning, and API-driven enterprise system integration. Improved warehouse pick accuracy by 20% and reduced fulfillment time by 15%.

META – MDM Platform for Qculous Devices

Architected a React-based MDM solution and mobile agent app for secure device onboarding, monitoring, and policy enforcement with encrypted communications across 5,000+ managed devices.

Meijer – Real-time Last-Mile Delivery (GroceryTech)

Led a 10-member team delivering a real-time delivery tracking and last-mile routing mobile solution. Managed sprint planning, CI/CD-based releases, and code reviews; delivered 3 major releases on schedule.

INTELITY – Hospitality Platform

Managed Android/iOS app development for a hospitality platform, leading a 12-member team, implementing CI/CD pipelines, and ensuring zero-downtime production releases.

Other Notable Projects

Summit Control (IoT Gate Automation) • LIVE Letting (Real Estate Platform) • Bayer Global Pharma Web • Elder Care IoT Healthcare App • Virtual Clinic / VC Doctor Apps • BuyOnBoard In-flight POS • Ciber Connect Enterprise App

TECHNICAL SKILLS

Mobile: Android (Kotlin, Java, Jetpack Compose), iOS (Swift, SwiftUI), Flutter, React Native, Xamarin

Frontend / Web: React JS, Next.js, TypeScript, JavaScript, HTML5, jQuery, PHP

AI & Agents: CopilotKit, AG-UI, A2-UI, Claude AI Agents, Claude-Agent, Orchestrator-based AI Assistants, Generative AI, NLP, Data Analysis & Model Training

Backend & APIs: Node.js, RESTful APIs, Python, Databricks, XML, JSON, MySQL, SQLite

DevOps & CI/CD: Jenkins, GitHub, GitLab, Azure DevOps, Git

Architecture & Patterns: MVVM, MVC, Singleton, Observer, Microservices, MDM/EMM

Cloud & IoT: Firebase, Google Maps, Google Ads, Azure, NFC, Bluetooth, Wi-Fi modules

Methodologies: Agile/Scrum, Waterfall, OKR Frameworks, SDLC, Sprint Planning, Budget Management

Libraries: Dagger 2, Hilt, RxJava, Rx Android, OpenTok, PayPal SDK

CERTIFICATIONS

Claude Code AI Tools Certified — Coursiv, 2026

AI Tools for Business & Productivity (In Progress) — Coursiv, 2025

Generative AI — Fundamentals to Advanced (In Progress) — Udemy, 2025

EDUCATION

Master of Computer Applications (MCA) — Thakur Institute of Management Studies, Career Development & Research, Mumbai (2008 – 2011)

Bachelor of Science (B.Sc.) — Ismail Yusuf College, Mumbai (2005 – 2008)
